Cumulative Index

Need to find something published earlier this year in *AATCC Review*? The index can help you find it quickly either by author or by subject matter.

For example, if you know that the article you are looking for was written by Parikh, a check of the index of authors shows that D. V. Parikh is the author of Title 25. The index of titles, in turn, identifies Title 25 as "Effect of Cotton Fiber Mercerization on the Absorption Properties of Cotton Nonwovens" and shows that it was published in the April issue (4) beginning on page 38.

If you don't know who wrote the article, you can locate it by using the key term index. You know, for example, that the article reports on absorbency and mercerization. Finding either of these terms in the key term index will give you the title numbers of all articles published this year pertaining to those terms.

The magazine is also available on microfilm from University Microfilms, Ann Arbor, Mich. 48106, U.S.A. In addition, the magazine is abstracted by *Chemical Abstracts*, *Engineering Index*, *Textile Technology Digest*, *Titus* (Institut Textil de France), and *World Textile Abstracts*.
